Liminal Space Game: Definition

As defined by the [aesthetics.fandom.com](https://aesthetics.fandom.com/wiki/Liminal_Space) wiki page:
“The aesthetic known as a **Liminal Space** is a location which is a transition between two other locations, or states of being. Typically these are abandoned, and oftentimes empty - a mall at 4am or a school hallway during summer, for example. This makes it feel **frozen** and slightly **unsettling**, but also familiar to our minds.”
